

Optimizing EDI Infrastructure for Long-Term Efficiency and Growth

 **EVERSTAR**

Silver Partner

The Challenge: Operational Inefficiencies in EDI Systems

EverStar conducted a comprehensive audit of the manufacturer's EDI infrastructure, uncovering inefficiencies that hindered performance and scalability:

- The manufacturer operated six separate PCs to handle EDI transactions, leading to high hardware costs and maintenance overhead.
- Manual "hand correction" procedures consumed significant labor hours and introduced error risks.
- The manufacturer planned to upgrade their ERP system from Macola to Microsoft Business Central, requiring seamless EDI integration to avoid disruptions with retail partners.

The Solution: Infrastructure Consolidation, Automation, and ERP Migration

*EverStar's **exceptional expertise** turned challenges into opportunities, delivering transformative solutions that enhanced efficiency, reduced costs, eliminated errors, and ensured seamless system **upgrades for long-term business growth and reliability.***

EverStar implemented a series of optimizations to address these challenges:

- **Infrastructure Consolidation:** Migrated EDI operations from six separate PCs to a single cloud-based server, reducing costs, maintenance, and complexity while improving reliability and scalability.
- **Process Automation:** Automated format conversion protocols to eliminate manual intervention, reducing labor costs and error rates.
- **Platform Migration:** Managed the seamless integration of EDI systems during the ERP upgrade, ensuring uninterrupted data flow and retailer relationships.

Measurable Business Impact

- 83% reduction in EDI infrastructure (from six PCs to one cloud server).
- Elimination of manual format corrections, reducing labor costs and error rates.
- Seamless ERP migration with zero disruption to retailer EDI connections.
- Five-year partnership demonstrating sustained value and system reliability.

The EverStar Advantage

EverStar's ability to deliver long-term operational efficiency stems from their deep expertise in Sterling Commerce EDI solutions. Their team specializes in optimizing EDI architecture, automating processes, and ensuring seamless system integrations to maintain reliable retailer relationships.

About EverStar

EverStar specializes in EDI architecture, implementation, integration, and ongoing support.

Our team helps companies automate processes, integrate systems, and maintain reliable retailer relationships through proven Sterling Commerce solutions.
